- The 1<sup>st</sup> Preparedness Drill for the year **2017** of **EDA THESSALONIKI-THESSALIA** was successfully conducted on **Wednesday 15 March 2017** in **Thessaloniki**. The success was made possible with the contribution of all services involved and the staff of the Gas Distribution Company, along with the participation of the Authorities and the contractor companies.
- The drill that was conducted by **EDA THESS** in **Thessaloniki** aimed at testing and checking the completeness of emergency plans and the required cooperation between the structures involved, at improving coordination, communication and management of information, and **mostly at effectively dealing with the incident**.
- The drill scenario was developed by the Network Management and Emergency Intervention Unit and involved a **“Gas leak”** at the internal installation of a boiler room inside an apartment building on 7 Navarinou street, Pavlos Melas Municipality, in Thessaloniki.

- EDA THESS on-duty technician arrives at the venue and performs initial autopsy, takes measurements and establishes that the leak comes from the internal installation (measurement 12% gas).

- The drill starts at **18:08** when a citizen calls EDA THESS Emergency Intervention Call Center to report a strong smell of gas in the apartment building on 7 Navarinou street, Pavlos Melas Municipality.

- Given that the leak is intense, it is necessary to shut down gas supply from the meter valve, in order to secure the building at first, until restoration is completed.

- The tenants are immediately advised to ventilate the premises and avoid any flames
