

## PERIODICITY OF NATURAL GAS METER READINGS

EDA THESS takes all reasonable measures so that the Metering Period is as stable as possible and records at regular intervals the gas meter readings, in accordance with the provisions of the Metering Regulation.

During the year, readings are made at the following frequency:

- five (5) times, from which three (3) times with on-site visit during the heating period for Delivery Points with use:
  - Cooking / hot water
  - Individual heating
  - Individual heating and Cooking / hot water

In rolling periods as follows:

<b>1<sup>st</sup> period</b>	<b>2<sup>nd</sup> period</b>	<b>3<sup>rd</sup> period</b>	<b>4<sup>th</sup> period</b>
01-15 January	16-31 January	01-15 February	16-28 February
01-15 March	16-31 March	01-15 April	16-30 April
01-15 November	16-30 November	01-15 December	16-31 December

For the above uses, the gas readings during the months of September, October, May and June are estimated based on the estimated annual consumption of each Delivery Point, according to the methodology of defining the typical consumption characteristics and creating standard consumption curves. 2018) and the numerical values of the approved consumption curves for the estimated period. No readings are taken during July and August.

- Seven (7) times for Delivery Points with use:
  - Central heating (21 - end of each month from October to April)
- Ten (10) times for Delivery Points with use:
  - Central heating and hot water (21 - end of each month except July - August)
- Each month (21- end of each month) for Delivery Points with other uses
- Each month (end of each month) for Delivery Points with possibility of remote reading (smart meters)
- Each month (end of each month) for Hourly Measured Delivery Points
